

The Baldwin County Commission is not affiliated with any of the utility providers

Below is a list of potential utility providers for properties located in towns, cities and communities of Baldwin County Alabama. The utility provider for property located in Baldwin County depends on where property is located- if it is inside or outside city limits, in a subdivision etc. Some properties may be in the service area of different municipality utility providers. For example, some subdivisions between Daphne & Fairhope that have a Daphne address may use Fairhope Utilities or Belforest Water for water service, Fairhope Utilities or BC Sewer for sewer, City of Daphne for garbage pickup and Riviera or EMC for power etc. Properties outside city limits could be included in the service area of a municipality utility provider if they are close enough to city limits. You may have to contact several service providers in your area to determine if they provide services to your property.
